

Sreng's Report on an optimizing project

1. [Performance issue] HCP Loading issue (T-16)

[Description]

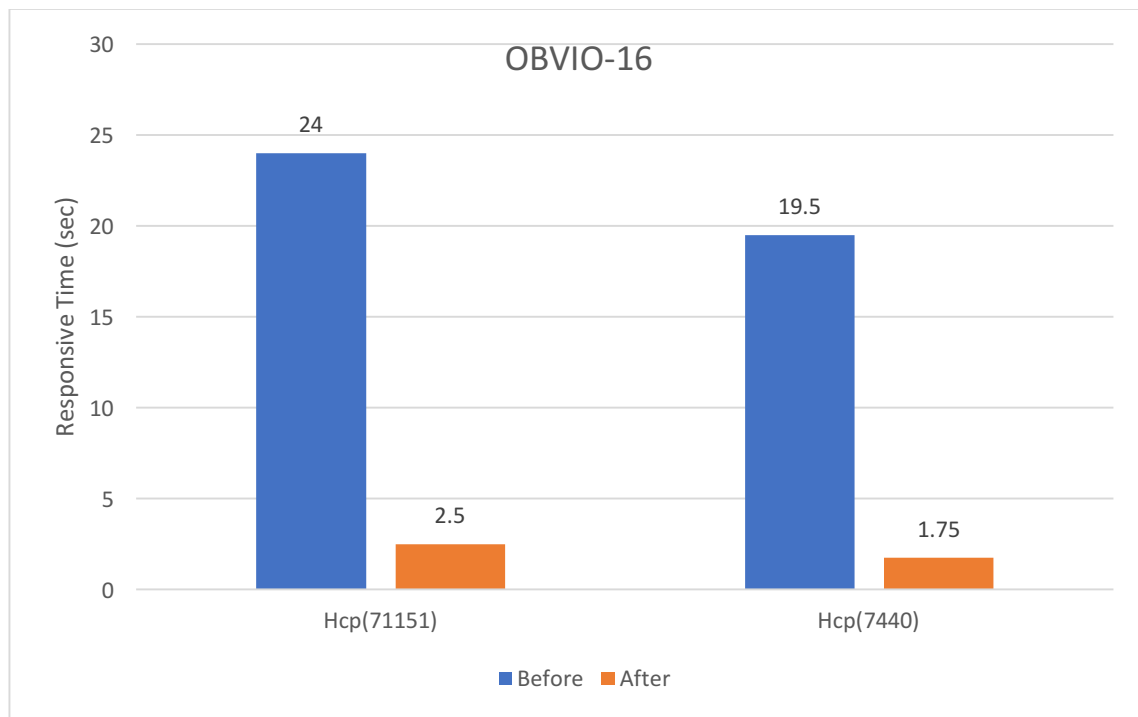

<https://dovemedihmc.com>

Please check attached screenshot. When HCP is selected, it takes too long to load.

Trace the code and find out how can we improve that part.

[Status]

RESOLVED

Average reduction Rate – 91.6%

SRENG-REPORT (16, 141, 147, 147)

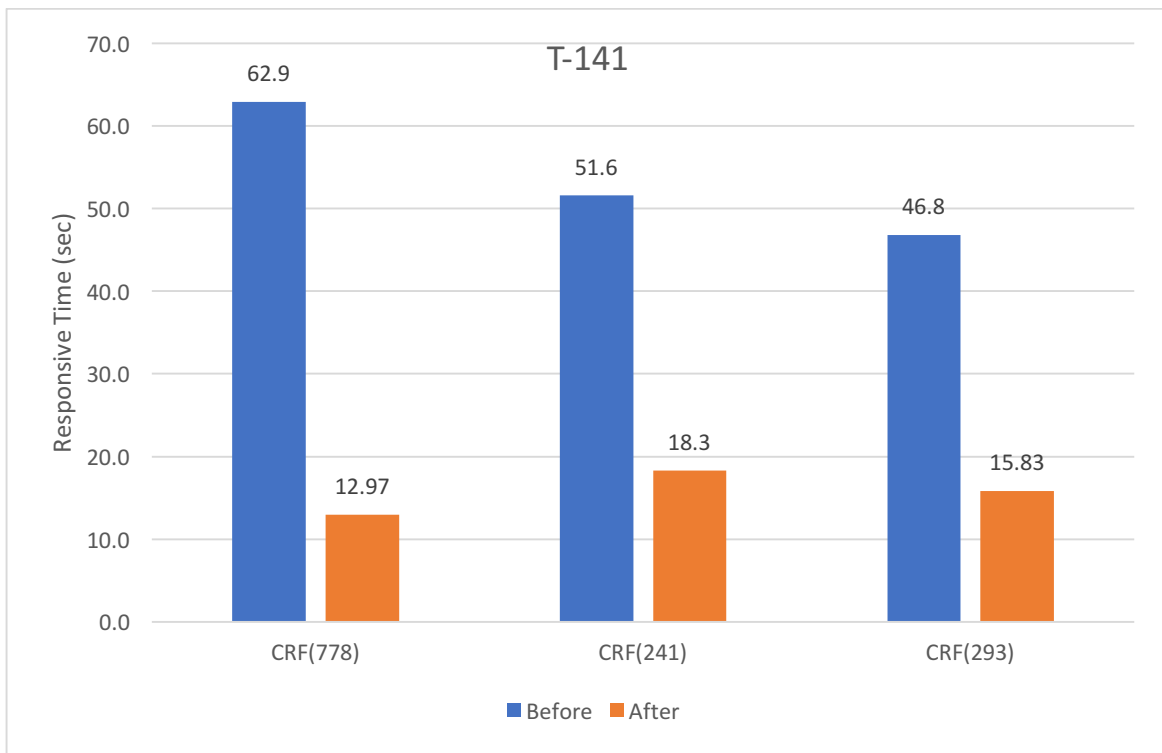

2. Something is wrong with Cycle data (T-141)

[Description]

It takes so long to load the form. We need ti improve performance there.

[Status]

RESOLVED

Average reduction Rate – 90.6%

SRENG-REPORT (16, 141, 147, 147)

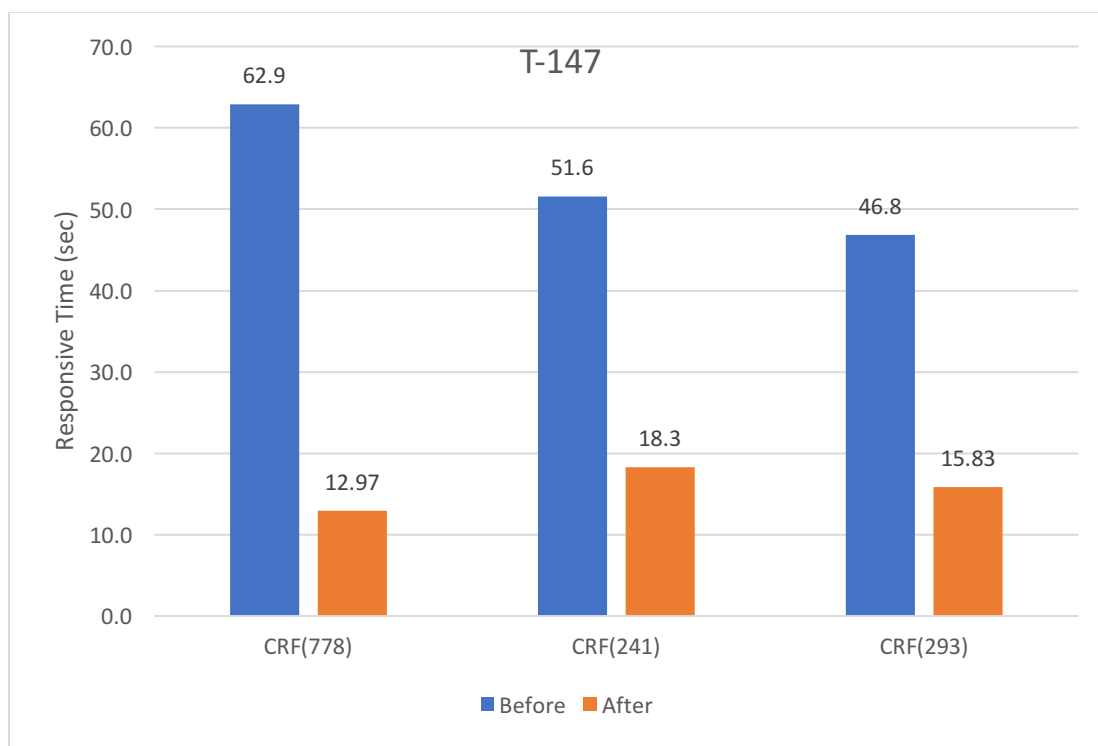

3. Exporting cycle forms takes too long (T-147)

[Description]

- Please improve the performance of exporting xls file.
- If we can place pre-loader, it will be helpful too.

[Status]

RESOLVED

Average reduction Rate – 70.8%
